Introduction of ScentifAI, Inc.

Company Name

ScentifAI, Inc （formerly Aroma Bit, Inc.）

Representative Director & CEO

Shunichiro Kuroki

Office

Headquarter (Sagami Bldg. 2F, 7-13-6 Ginza, Chuo-ku, Tokyo)
Numazu Office (18-9 Ichibacho, Numazu-shi, Shizuoka)

Business Domain

Development, Production and Sales of electronic equipment and systems including compact smell imaging sensors. Production, Development and Sales of innovative services using the Sensor products. Other business related to the above.

Main Bank

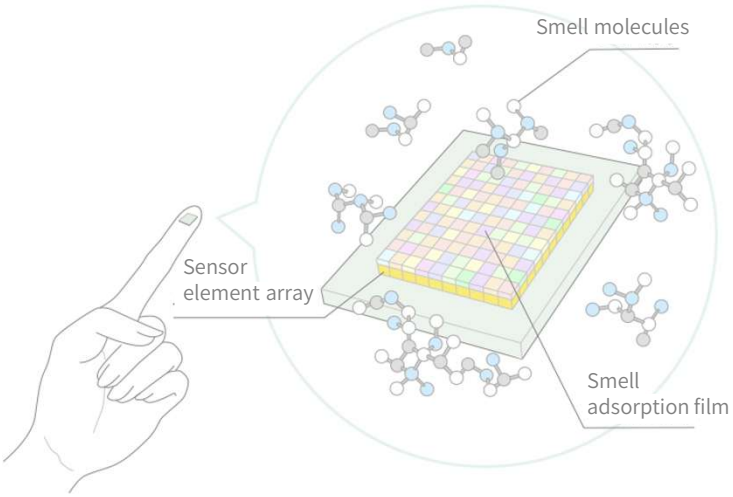

Sumitomo Mitsui Banking Corporation / Resona Bank

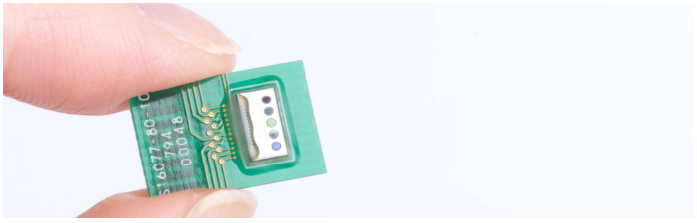

Main Business Partners

Anritsu Corporation / Kyocera Corporation / Sanyo Chemical Industries, Ltd. / Sony Corporation / DENTSU Inc. / Toyota Boshoku Corporation / West Japan Railway Company / Japan Tobacco Inc. / Panasonic Electric Works / Meiji Holdings Co., Ltd / Japan Manned Space Systems Corporation (JAMSS) / LOTTE Co., Ltd / Food and Beverages, Cosmetics, Fragrances, Daily necessities, Electronics and Home appliances, IT services, Automotive parts, Gas, Chemicals, Electronic components, Industrial machinery, Medical equipment, Paper manufacturing, Research and Development, University research institutions, Space-related industries, Government agencies, etc.

Introduction of smell sensor

Our company's smell sensor is an e-Nose type sensor that mimics the mechanism by which living creatures smell. It is a multi-array sensor consisting of many sensor elements, each of which is coated with a different "smell adsorption membrane".

Each of these smell adsorption membrane has different surface adsorption characteristics, and each smell, as a complex of unspecified chemical substances, is quantified as a specific response pattern.
By learning the numerical values of various smells, it is possible to determine the smell.

■5C-SSM (CMOS type sensor)
The CMOS sensor itself has the ability to store an electric charge on its surface, and the increase or decrease in the amount of charge caused by the adsorption/desorption of smell molecules on the membrane is used to convert the data into numerical values.

Olfaction AI Platform

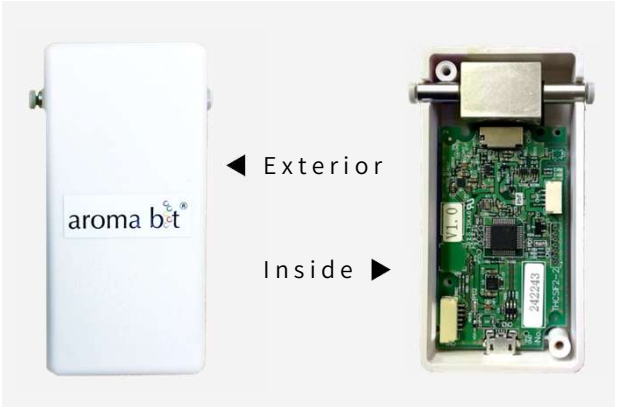

ScentifAI®
Smell detection application

Aromalyzer®
Smell sensor evaluation kit

Aroma Anomaly Detector (Prototype)
Environmental change application

CMOS evaluation kit_box (CEK)
Smell sensor evaluation kit
